CONSTRUCTION DIVISION

Selecting an electrical contractor is one of the most important decisions of a building project manager. For over 97 years, Hyre has provided government and business with knowledgeable, competent electrical contracting. Virtually every type of work has been undertaken successfully.

Our trained corps of electricians is able to handle a wide variety of assignments, large and small, and our staff is large enough to handle many jobs at the same time.

Satisfied clients include:

- Commercial and Retail
- Hospitals, public and private
- Public Utilities
- Financial Institutions
- Shopping Malls
- Apartment Complexes
- Office Buildings
- Heavy Industry
- Light Industry
- Refineries
- Steel Mills
- Many more, and references are available upon request.

PROJECT MANAGEMENT

The quality of management at Hyre guarantees success. The complexities of the construction process requires the efficient allocation of material and labor which makes the difference in the quality and cost of the end product. Hyre Electric's management team has perfected a system through the use of advanced software and data analysis to manage construction. Problems are defined long before they impact the work schedule. In the end, Hyre Electric keeps the work flowing smoothly through the construction schedule. The result: Hyre's skill and concern in all phases is demonstrated by an outstanding record of completing jobs on time, to specifications, and on budget. Hyre's respect and reputation is also based on 97 years of never having had a work stoppage due to a labor dispute. Hyre not only agrees to do a job, it promises to do it right!

ESTIMATING

A successful construction company whose abilities are honed on the grinding wheel of competitive bidding must have a high degree of estimating skills. An art as much as science, estimating is where yesterday's vision is transformed into today's intricate electrical systems. Hyre Electric has been awarded, through their successful bidding procedures and reputation, many competitive projects (see Completed Projects)

It is in the estimating department that successful project execution actually begins. Hyre Electric's state of the art designed software systems provide a task by task time line of your unique project. This data added to the experience and knowledge of top management, controls costs and work flow thru critical real time management of people and resources involved in your project. The Hyre project Management System has proven continual success in identifying potential problem areas before they impact the work process. The result-total control, smoother work flow, on time schedules, cost efficiency in labor and materials, and a satisfied customer.

MAINTENANCE AND SERVICE

As an experienced contractor serving major industry, **HYRE ELECTRIC** has developed special competence in providing a full range of plant maintenance and repair services. Hyre's crews are on call around the clock to guarantee you professional electrical service. Their ability to provide reliable and experienced crews on short notice is built on generations of service to basic manufacture, processing, refining and power production industries. Hyre's established client base will stand behind the company's strong abilities in maintenance and service!

OVER 95 YEARS OF DEPENDABILITY AND EXCELLENCE.

HYRE ELECTRIC - SINCE 1912

HYRE ELECTRIC Company is one of the Midwest's leading contractors. For over nine decades the company has counted among its customers the flagship corporations of American Industry. Much of the company's growth largely results from satisfied clients who come back to Hyre time after time for additional construction projects.

HYRE ELECTRIC Company was founded in Chicago in 1912 and operated during its early years as an electric motor repair facility. As electrification spread, contract work became a logical extension of the company's motor repair business. Prompted by repair customers, Hyre expanded into industrial, commercial, and institutional electrical construction.

For **HYRE ELECTRIC** Company, the management team sees construction as a series of critical coordinating activities which guarantees the timely completion of the project. From the original bid or design through the formalized construction schedule and on to the final punch list, the management team at Hyre provides a vast wealth of experience to the construction process.

Hyre maintains a strong orientation towards the customer, an excellent financial position, a well established track record for safety, reliability and years of experience.
